Cardio-Vascular Nursing

An Official Journal of the American Heart Association, Inc.

1965–1973

VOLUMES I–IX

CUMULATIVE INDEX

EDITORS OF CARDIOVASCULAR NURSING
1965-1973

Marie S. Andrews, R.N.
Maurice R. Chassin, M.D.
1965-1967

Signe S. Cooper, R.N.
George G. Rowe, M.D.
1968-1970

H. Mildred McIntyre, R.N.
Dean T. Mason, M.D.
1971-1973

American Heart Association, Inc., 44 East 23rd Street, New York, New York 10010

Cardiovascular Nursing

CONTENTS

Vol. I—1965

No. 1 (Winter)
Stroke: Some Nursing Responsibilities. **Helen C. Anderson** 1

No. 2 (Spring)
Contrast Visualization of the Cardiovascular System.
Virginia Fernandez, Patricia K. Reppert and Edmund H. Reppert 5

No. 3 (Summer)
The Meaning of Rest. **Amasa B. Ford** 11

No. 4 (Fall)
Cardiac Arrhythmias—Diagnosis and Clinical Treatment.
Rodman D. Starke, Francis L. Chamberlain, and Lois Jahn 15

Vol. II—1966

No. 1 (Winter)
Nursing Care of a Patient with an Implanted Artificial Pacemaker.
Sister Mary Consilium Moore 19

No. 2 (Spring)
Closed Chest Cardiopulmonary Resuscitation. **Edith V. Olson** 23

No. 3 (Summer)
The Maternity Patient with Heart Disease. **Marguerite F. Fogg** 27

No. 4 (Fall)
The Nurse, the Cardiac Patient and His Diet. **Patricia B. Harrington** 31

Vol. III—1967

No. 1 (January-February)
Nursing in a Coronary Care Unit. **Rose Pinneo** 1

No. 2 (March-April)
Building Nursing within the American Heart Association. **Edith V. Olson** . . . 5

No. 3 (May-June)
Medical Aspects of Congestive Heart Failure. **William J. Welch** 9

No. 4 (July-August)
Public Health Nursing and the Congestive Heart Failure Patient.
Paul R. Torrens and Effie S. Hanchett 15

No. 5 (September-October)
Clinical Nursing and the Congestive Heart Failure Patient.
Hattie Mildred McIntyre 19

No. 6 (November-December)
Chronic Cor Pulmonale **J. H. Dwek** 25

Vol. IV—1968

No. 1 (January-February)
Rheumatic Heart Disease. **Blair D. Erb and Georgia R. Wilson** 1

No. 2 (March-April)
Emotion Aspects of Cardiovascular Surgery. **Maryann Powers** 7

No. 3 (May-June)
Treatment with Anticoagulants. **Ovid O. Meyer** 11

No. 4 (July-August)
Cardiac Catherization and Related Procedures. **Ross C. Kory** 17

No. 5 (September-October)
Traumatic Heart Disease. **Loren F. Parmley, Jr.** 23

No. 6 (November-December)
Complications of Cardiac Catheterization. **H. J. Swan** 27

Vol. V—1969

No. 1 (January-February)
A Teaching Plan for Cardiac Surgical Patients. **Mary A. Brambilla** 1

No. 2 (March-April)
Legal Aspects of Nursing Care for Cardiac Patients. **Bernice E. Anderson** . . . 5

No. 3 (May-June)
The Role of the Nurse in Regional Medical Programs. **Laura G. Larson** 9

No. 4 (July-August)
The Patient in Cardiogenic Shock. **Dona Gilbo Morris** 15

No. 5 (September-October)
Cardiovascular Complications of Obesity. **James K. Alexander** 19

No. 6 (November-December)
Heart Muscle Disease (Cardiomyopathy). **G. E. Burch and N. P. DePasquale** . . 23

Vol. VI—1970

No. 1 (January-February)
Risk Factors in Coronary Heart Disease.
Thomas R. Dawber and H. Emerson Thomas, Jr. 29

No. 2 (March-April)
Fluids, Electrolytes, and Circulation. **Virginia Earles** 35

No. 3 (May-June)
Respiratory Problems and the Nurse's Changing Responsibilities. **Judith Sitzman** 41

No. 4 (July-August)
Current Status of the Rubella Problem. **Philip R. Ziring** 47

No. 5 (September-October)
Dysphasia: The Patient, His Family and the Nurse. **McKenzie Buck** 51

No. 6 (November-December)
Teaching the Patient with a Pacemaker. **Barbara A. Kos and Pamela A. Culbert** . 57

Vol. VII—1971

No. 1 (January-February)
Monitoring the Acutely Ill Cardiac Patient.
Alice Delano, Betty Carrel, Herbert Shubin, and Max Harry Weil 61

No. 2 (March-April)
Psychological Considerations on the Coronary Care Unit. **Abraham J. Twerski** . 65

No. 3 (May-June)
Hyperbaric Oxygenation Part I: Therapeutic Benefits.
Virginia J. Neelon and Henry D. McIntosh 69

No. 4 (July-August)
Hyperbaric Oxygenation Part II: Hazards and Implications.
Virginia J. Neelon and Henry D. McIntosh 73

No. 5 (September-October)
The Prevention of Heart Disease: A Greater Challenge.
H. Mildred McIntyre and Dean T. Mason. 77

No. 6 (November-December)
The Nurse's Role in Blood Gas Monitoring. **Carol Betson** 83

Vol. VIII—1972

No. 1 (January-February)
Medical Aspects of Artificial Pacing of the Heart. **Doris J. W. Escher** 1

No. 2 (March-April)
Nursing Care of Patients with Pacemakers. **Ruth E. Barstow** 7

No. 3 (May-June)
Precoronary Care: Nursing Considerations.
Carol P. Germain and William F. Minogue 11

No. 4 (July-August)
Nurse-Managed Cardiac Clinics. **Judy Crews** 15

No. 5 (September-October)
The Vital Significance of Clinical Nursing Research. **Lucille E. Notter** 19

No. 6 (November-December)
Why Continuing Education in Nursing? **Signe S. Cooper** 23

Vol. IX—1973

No. 1 (January-February)
Pulmonary Physiology at the Bedside: Oxygen and
Carbon Dioxide Abnormalities. **Stephen M. Ayres and Joanne Lagerson** . . . 1

No. 2 (March-April)
Hazards of Electronic Equipment in Critical Care Areas:
A Research Approach. **H. L. Green** 7

No. 3 (May-June)
Respiratory Function after Acute Myocardial Infarction:
Implications for Nursing. **Betty Bunke** 13

No. 4 (July-August)
The Nurse and Cardiovascular Drug Therapy. **Jane M. Lancour** 19

No. 5 (September-October)
Developing Dynamic Scientific Sessions for Nurses:
A Three-Year Retrospective. **Rita K. Chow** 23

No. 6 (November-December)
The Infant with Transposition of the Great Arteries.
Lisbet Rydin and Mary Allen Engle 27

Cardiovascular Nursing

AUTHOR INDEX

Volumes 1—9
1965—1973

A

Alexander, J. K., 5:19, 1969
Anderson, B. E., 5:9, 1969
Anderson, H. C., 1:1, 1965
Ayres, S. M., 9:1, 1973

B

Barstow, R. E., 8:7, 1972
Brambilla, M. A., 5:1, 1969
Buck, M., 6:51, 1970
Bunke, B., 9:13, 1973
Burch, G. E., 5:23, 1969

C

Carrel, B., 7:61, 1971
Chamberlain, F. L., 1.15, 1965
Chapman, C. B., 1:1, 1965
Chow, R. K., 9:23, 1973
Cooper, S. S., 8:23, 1972
Crews, J., 8:15, 1972
Culbert, P. A., 6:57, 1970

D

Dawber, T. R., 6:29, 1970
Delano, A., 7:61, 1971
DePasquale, N. P., 5:23, 1969
Dwek, J. H., 3:25, 1967

E

Earles, V., 6:35, 1970
Engle, M. A., 9:27, 1973
Erb, B. D., 4:1, 1968
Escher, D. J. W., 8:1, 1972

F

Fernandez, V., 1:5, 1965
Fogg, M. F., 2:27, 1966
Ford, A. B., 1:11, 1965

G

Germain, C. P., 8:11, 1972
Green, H. L., 9:7, 1973

H

Hanchett, E. S., 3:15, 1967
Harrington, P. B., 2:31, 1966

Cardiovascular Nursing

SUBJECT INDEX

Volumes 1—9
1965—1973

A

Acid-base balance
pulmonary physiology and, 9:1, 1973
Acidosis and alkalosis
fluids and electrolytes, 6:35, 1970
respiratory and metabolic, 7:83, 1971; 9:1, 1973
Alcoholic cardiomyopathies
prevention of, 7:77, 1971
Alkalemia
respiratory function after acute myocardial infarction, 9:13, 1973
Alveolar ventilation
common causes of alveolar hypoventilation, 3:25, 1967; 9:13, 1973
American Heart Association
nursing participation, 3:5, 1967
American Nurse's Association, 3:5, 1967
Angiocardiography
complications of cardiac catheterization, 4:27, 1968
Angiography
cardiac, 1:5, 1965
contrast material, 1:5, 1965
risks involved, 1:5, 1965
types of, 1:5, 1965
Anticoagulant therapy
blood clotting factors, 4:11, 1968
cardiac clinics, 8:15, 1972
fibrinolytic agents, 4:11, 1968
indications for, 4:11, 1968
types of, 4:11, 1968
Anxiety
congestive heart failure and, 3:19, 1967
role of nurse in combatting, 7:65, 1971
Aortic stenosis
and rheumatic heart disease, 4:1, 1968
Arrhythmias
associated with cardiac catheterization, 4:27, 1968
atrial flutter and fibrillation, 1:15, 1965
complication of congestive cardiomyopathy, 5:23, 1969
D.C. countershock ("cardioversion"), 1:15, 1965
diagnosis and clinical treatment, 1:15, 1965
monitoring devices, 7:61, 1971
pacing and pacemakers, 8:1, 1972
paroxysmal supraventricular tachycardias, 1:15, 1965
after penetrating or nonpenetrating injuries, 4:23, 1968
premature beats, 1:15, 1965
symptoms, 1:15, 1965
ventricular fibrillation, 1:15, 1965
ventricular tachycardia, 1:15, 1965
Arterial blood gases. See Blood gases
Arteriography
coronary artery catheterization, 4:17, 1968
peripheral, 1:5, 1965
Asthma, bronchial
oxygen and carbon dioxide abnormalities, 9:1, 1973
Atelectasis
oxygen and carbon dioxide abnormalities, 9:1, 1973
Atherosclerosis
diet and, 2:31, 1966
prevention of, 7:77, 1971
risk factors, 7:77, 1971
Atria
flutter and fibrillation, 1:15, 1965
left atrial catheterization, 4:17, 1968
premature beats, 1:15, 1965
Auscultation
diagnosis of respiratory disease, 6:41, 1970

B

Bed rest
congestive heart failure therapy, 3:9, 1967
value in heart disease, 1:11, 1965
See *also* Rest
Birth defects
congenital heart disease and, 7:77, 1971
Blood clots
blood clotting factors, 4:11, 1968
fibrinolytic agents, 4:11, 1968
See *also* Anticoagulant therapy
Blood gases
catheterization and, 4:17, 1968
cor pulmonale, 3:25, 1967
monitoring, 7:61, 83, 1971
obtaining blood sample, 7:83, 1971
technique, 7:83, 1971
oxygen and carbon dioxide abnormalities, 9:1, 1973
pH and acid balance, 7:83, 1971
pulmonary physiology at bedside, 9:1, 1973
Blood pressure
obese patients, 5:19, 1969
Bradycardias
pacing and pacemakers, 8:1, 1972
Brain damage
cardiopulmonary resuscitation to prevent, 2:23, 1966

dysphasia, 6:51, 1970
Bronchitis, chronic, 3:25, 1967
respiratory problems, 6:41, 1970

C

Carbon dioxide
abnormalities, 9:1, 1973
hypocarbia and hypercarbia, 7:83, 1971
pulmonary ventilation and, 9:1, 1973
Carbon monoxide poisoning
hyperbaric oxygenation and, 7:69, 1971
Cardiac arrest
cardiopulmonary resuscitation, 2:23, 1966
fluid and electrolyte balance, 6:35, 1970
obesity and, 5:19, 1969
pulmonary physiology, 9:1, 1973
Cardiac output
catheterization for measuring, 4:17, 1968
indication of reduced, 3:19, 1967
Cardiogenic shock, 5:15, 1969
nursing assessment, 5:15, 1969
Cardiomyopathies
congestive, 5:23, 1969
heart muscle diseases, 5:23, 1969
obstructive, 5:23, 1969
prevention of, 7:77, 1971
restrictive, 5:23, 1969
treatment, 5:23, 1969
Cardiopulmonary failure, 3:25, 1967
Cardiovascular system
contrast visualization of, 1:5, 1965
Cardioversion
for treating arrhythmias, 1:15, 1965
Care programs. See Nursing Care
Carotid insufficiency
anticoagulant therapy, 4:11, 1968
Catheter studies
and angiographic studies, 1:5, 1965
Catheterization
complications, 4:27, 1968
left atrial, 4:17, 1968
left ventricular, 4:17, 1968
procedures, 4:17, 1968
evaluation of, 4:27, 1968
right heart, 4:17, 1968
study by National Heart Institute, 4:27, 1968
techniques, 4:17, 1968
Cellular biochemistry
fluids and electrolytes, 6:35, 1970
Central venous pressure
monitoring, 7:61, 1971
Cerebral angiography
contrast visualization, 1:5, 1965
Cerebrovascular disease
anticoagulant therapy, 4:11, 1968
Chest injuries, 4:23, 1968
Chest roentgenograms
heart muscle disease, 5:23, 1969
Children and infants
prevention of rheumatic fever, 7:77, 1971
resuscitation techniques, 2:23, 1966
rubella (German measles), 6:47, 1970
transposition of great arteries, 9:27, 1973
Cholesterol
effect of diet on blood levels of, 2:31, 1966
relationship between atherosclerosis and, 2:31, 1966
risk factor in coronary heart disease, 6:29, 1970
Cigarette smoking
major cause of pulmonary heart disease, 7:77, 1971
and risk of coronary heart disease, 6:29, 1970
Circulation
anticoagulant treatment, 4:11, 1968
fluid and electrolyte balance, 6:35, 1970
Clinics, cardiac
anticoagulant patients, 8:15, 1972
compliance with medical regimens, 8:15, 1972
congestive heart failure patients, 3:19, 1967
nursing systems, 8:15, 1972
patient population, 8:15, 1972
self-care needs, 8:15, 1972
Clostridium Welchii
hyperbaric oxygenation and, 7:69, 1971
Community resources
stratified system of coronary care, 8:11, 1972
Compression
external cardiac, 2:23, 1966
Conferences and workshops for nurses, 8:23, 1972
Congenital heart disease
prevention of, 7:77, 1971
resulting from rubella, 6:47, 1970
Congestive cardiomyopathies, 5:23, 1969
Congestive heart failure
adherence to medical treatment plan, 3:15, 1967
after cardiac injuries, 4:23, 1968
causes, 3:9, 1967
clinical nursing and, 3:19, 1967
assisting cardiac function, 3:19, 1967
emergency complications, 3:19, 1967
meeting emotional needs, 3:19, 1967
patient assessment, 3:19, 1967
physiological status and, 3:19, 1967
reducing need for oxygen, 3:19, 1967
diet and nutrition, 2:31, 1966
fluid and electrolyte balance, 6:35, 1970
heart muscle disease and, 5:23, 1969
medical aspects, 3:9, 1967
nurse-managed cardiac clinics, 8:15, 1972
obesity and, 5:19, 1969
patient's physical status, 3:15, 1967
public health nursing and, 3:15, 1967
refractory, 3:9, 1967
respiratory insufficiency and, 3:25, 1967
social and emotional problems, 3:15, 1967
symptoms, 3:9, 1967

therapeutic measures, 3:9, 1967
Continuing nursing education
need for, 8:23, 1972
Contrast visualization
cardiac angiography, 1:5, 1965
cardiac catheterization, 4:17, 1968
cardiovascular system, 1:5, 1965
equipment and techniques, 1:5, 1965
nurse's role, 1:5, 1965
in cardiac catheterization laboratory, 1:5, 1965
preparing patient, 1:5, 1965
pulmonary angiography, 1:5, 1965
risk factors, 1:5, 1965
types of angiographic studies, 1:5, 1965
Convalescent care, 1:1, 1965
cardiac patients, 3:9, 1967
Cor pulmonale (pulmonary heart disease)
cardiopulmonary failure, 3:25, 1967
causes, 3:25, 1967
chronic obstructive lung disease, 3:25, 1967
guide to monitoring patient's progress, 3:25, 1967
prevention of, 7:77, 1971
respiratory function, 3:25, 1967
tracheostomy care, 3:25, 1967
Coronary angiography
visualization studies of coronary circulation, 1:5, 1965
Coronary arteries
catheterization, 4:17, 1968
Coronary care units
delays in securing medical aid, 8:11, 1972
equipment, 3:1, 1967
guide to monitoring patient's progress, 3:25, 1967
hazards of electronic equipment, 9:7, 1973
legal responsibilities of nurses, 5:5, 1969
life-support stations, 8:11, 1972
mobile, 8:11, 1972
monitoring acutely ill patients, 3:25, 1967; 7:61, 1971
organization of, 3:1, 1967
physical design, 3:1, 1967
precoronary care, 8:11, 1972
preventive and educational programs, 8:11, 1972
psychological considerations, 7:65, 1971
role of nurses, 3:1, 1967
Coronary heart disease
precoronary care, 8:11, 1972
risk factors, 6:29, 1970
Coronary insufficiency
anticoagulant therapy, 4:11, 1968
Coumarin compounds
for anticoagulant treatments, 4:11, 1968
Council on Cardiovascular Nursing
developing dynamic scientific sessions for nurses, 9:23, 1973
membership, 9:23, 1973
Countershock
for treating arrhythmias, 1:15, 1965
Cyanosis
oxygen and carbon dioxide abnormalities, 9:1, 1973

D

Deafness. See Hearing loss
Deaths
from cardiac catheterization, 4:27, 1968
clinical and biological, 2:23, 1966
Decompression sickness
hyperbaric oxygenation and, 7:69, 73, 1971
Defibrillation
resuscitation and, 2:23, 1966
Defibrillators
coronary care units, 3:1, 1967
design and function, 9:7, 1963
hazards of electronic equipment, 9:7, 1973
Depressive symptoms
congestive heart failure, 3:19, 1967
dysphasic patients, 6:51, 1970
Diabetes mellitus
risk factor in coronary heart disease, 6:29, 1970
Dicumarol
for anticoagulant treatments, 4:11, 1968
Diet and nutrition, 2:31, 1966
congestive heart failure, 2:31, 1966
risk factor in coronary heart disease, 6:29, 1970
weight reduction diets, 2:31, 1966
Digitalis
arrhythmias and, 1:15, 1965
congestive heart failure therapy, 3:9, 19, 1967
potassium depletion and, 6:35, 1970
Diuretics
congestive heart failure therapy, 3:9, 19, 1967
fluid and electrolyte balance, 6:35, 1970
Drug therapy
comprehensive patient assessment, 9:19, 1973
nursing intervention, 9:19, 1973
problem identification, 9:19, 1973
teaching plan, 9:19, 1973
observations of patient, 9:19, 1973
patient's history, 9:19, 1973
questioning patients, 9:19, 1973
resuscitation and, 2:23, 1966
Dysphasia
patient, family, and nurse, 6:51, 1970

E

Edema
congestive heart failure and, 3:15, 1967
obesity and, 5:19, 1969
Education in nursing
changing roles for nurses, 8:23, 1972
continuing education, 8:23, 1972
educational media, 8:23, 1972

inservice education, 8:23, 1972
reading and writing, 8:23, 1972
self-direct learning, 8:23, 1972
trends in, 8:23, 1972

Elderly persons
congestive heart failure, 3:15, 1967
planning physical activity, 1:11, 1965
teaching patient with pacemaker, 6:57, 1970

Electrical hazards, 9:7, 1973
pacing and pacemakers, 8:1, 7, 1972

Electrocardiography
arrhythmias, 1:15, 1965
hazards of electronic equipment, 9:7, 1973
heart muscle disease, 5:23, 1969
monitoring systems, 7:61, 1971
resuscitation techniques and, 2:23, 1966

Electrolytes. See Fluids and electrolytes

Emboli
complication of congestive cardiomyopathies, 5:23, 1969

Emergencies
legal responsibilities of nurses, 5:5, 1969

Emergency care
cardiopulmonary resuscitation, 2:23, 1966
outside coronary care units, 8:11, 1972
recognition or prevention, 3:19, 1967

Emotional problems
of cardiovascular surgery, 4:7, 1968
confidence and support for the nurse, 4:7, 1968
congestive heart failure, 3:19, 1967
establishing trust, 4:7, 1968

Emphysema
cor pulmonale and, 3:25, 1967
respiratory problems, 6:41, 1970

Epidemiology
rheumatic heart disease, 4:1, 1968
risk factors in coronary heart disease, 6:29, 1970

Equipment
hazards of electronic, 9:7, 1973
preventive maintenance programs, 9:7, 1973
selection of, 9:7, 1973
training programs for hospital employees, 9:7, 1973

Exercise
energy costs of individual human activities, 1:11, 1965
Master two-step test, 1:11, 1965
planning physical activities, 1:11, 1965
and risk of coronary heart disease, 6:29, 1970

Eye defects
resulting from rubella, 6:47, 1970

F

Family relationships
acutely ill cardiac patients, 7:65, 1971
children with congenital rubella, 6:47, 1970
dysphasic patients, 6:51, 1970
emotional aspects of cardiovascular surgery, 4:7, 1968

Fear and anxiety
relieving, 1:1, 1965

Fibrinolytic agents, 4:11, 1968

Fick principle
measurement of cardiac output, 4:17, 1968

Fluid and electrolytes
circulation and, 6:35, 1970
monitoring, 7:61, 83, 1971
pH and acid balance, 7:83, 1971

G

German measles
current status of rubella problem, 6:47, 1970

Gout
and risk of coronary heart disease, 6:29, 1970

Government involvement in health
regional medical programs, 5:9, 1969

Government regulations
hazards of electronic equipment, 9:7, 1973

H

Hearing loss
resulting from rubella, 6:47, 1970

Heart block
diagnosis and drug therapy, 2:19, 1966
nursing care of patient with pacemaker, 2:19, 1966
pacing and pacemakers, 2:19, 1966; 8:1, 1972
surgery, 2:19, 1966

Heart disease
arrhythmias, 1:15, 1965
effects of bed rest, 1:11, 1965
nomenclature and criteria for diagnosis, 2:27, 1966
prevention of, 7:77, 1971
prognosis and treatment, 2:27, 1966

Heart muscle diseases (cardiomyopathies), 5:23, 1969
clinical manifestations, 5:23, 1969
electrocardiograms, 5:23, 1969
prevention of, 7:77, 1971
treatment, 5:23, 1969

Hemoglobins
oxyhemoglobin dissociation curve, 9:1, 1973

Hemorrhages
traumatic heart disease and, 4:23, 1968
treatment, 4:11, 1968

Heparin
anticoagulant treatments, 4:11, 1968

Hospitals
emotional aspects of cardiovascular surgery, 4:7, 1968
equipment selection, 9:7, 1973
legal responsibilities of nurses, 5:5, 1969

life-support stations, 8:11, 1972
mobile coronary care units, 8:11, 1972
patient's activities following discharge, 5:1, 1969
precoronary care, 8:11, 1972
preoperative environment, 4:7, 1968
establishing trust, 4:7, 1968
preventive maintenance programs, 9:7, 1973
teaching plan for cardiac surgical patients, 5:1, 1969
training programs for employees, 9:7, 1973
wiring and safety, 9:7, 1963
See *also* Coronary care units

Hyperbaric oxygenation
development of skills and knowledge, 7:73, 1971
equipment, 7:73, 1971
hazards and implications, 7:73, 1971
secondary pressure phenomena, 7:73, 1971
sites affected, 7:73, 1971
reevaluation of therapy, 7:73, 1971
therapeutic benefits, 7:69, 1971

Hypercapnia
oxygen and carbon dioxide abnormalities, 9:1, 1973

Hypercholesterolemia
risk factor in coronary heart disease, 6:29, 1970

Hyperkalemia
fluids and electrolytes, 6:35, 1970

Hypertension
diet and nutrition, 2:31, 1966; 5:19, 1969
prevention of, 7:77, 1971
and risk of coronary heart disease, 6:29, 1970
weight reduction and other therapy, 5:19, 1969

Hypertrophy of left ventricle, 5:23, 1969
and risk of coronary heart disease, 6:29, 1970

Hypocarbia and hypercarbia
blood gas monitoring and, 7:83, 1971

Hypoventilation
alveolar, 3:25, 1967; 9:13, 1973

Hypoxemia
oxygen and carbon dioxide abnormalities, 9:1, 1973
respiratory function after acute myocardial infarction, 9:13, 1973

Hypoxia
chronic cor pulmonale, 3:25, 1967
effect of hyperbaric oxygenation therapy, 7:69, 1971

I

Indandiones
for anticoagulant treatments, 4:11, 1968

Indicator-dilution method
catheterization and, 4:17, 1968

Injuries, cardiovascular, 4:23, 1968
penetrating and nonpenetrating, 4:23, 1968

Instrumentation
hazards of electronic equipment, 9:7, 1973

Intensive coronary care units, 3:1, 1967
monitoring systems, 7:61, 1971
psychological considerations, 7:65, 1971
teaching plan for patients, 5:1, 1969
See *also* Coronary care units

Inter-Society Commission for Heart Disease Resources
establishment of, 7:77, 1971
Statement on Primary Prevention, 7:77, 1971

K

Kidney function
fluids, electrolytes and circulation, 6:35, 1970

L

Language training
dysphasic patients, 6:51, 1970

Left atrial catheterization, 4:17, 1968

Left ventricle
catheterization, 4:17, 1968
hypertrophy, 5:23, 1969
risk of coronary heart disease and, 6:29, 1970

Legal aspects of nursing care
cardiac patients, 5:5, 1969

Lesions
penetrating and nonpenetrating injuries, 4:23, 1968

Liability insurance
for coronary care nurses, 3:1, 1967

Life-support stations, 8:11, 1972

Lipids, blood
risk factor in coronary heart disease, 6:29, 1970

Lungs
chronic cor pulmonale, 3:25, 1967
chronic obstructive lung diseases, 3:25, 1967
respiratory function, 3:25, 1967
ventilation of, 2:23, 1966

M

Menopause
and risk of coronary heart disease, 6:29, 1970

Metabolic alkalosis and acidosis, 7:83, 1971
pulmonary physiology, 9:1, 1973

Metabolic factors
and risk of coronary heart disease, 6:29, 1970

Mitral insufficiency, 4:1, 1968

Mitral stenosis
and rheumatic heart disease, 4:1, 1968

Mobile coronary care units, 8:11, 1972

Monitoring
acutely ill cardiac patients, 7:61, 1971
blood gases, 7:61, 83, 1971
coronary care units, 3:1, 1967
design and function of monitors, 9:7, 1963
electrocardiographic, 7:61, 1971
hazards of electronic equipment, 9:7, 1973

Mortality
coronary heart disease, 8:11, 1972
heart disease and maternal deaths, 2:27, 1966
Myocardial infarction
anticoagulant therapy, 4:11, 1968
heart-lung dysfunction cycle, 9:13, 1973
precoronary care, 8:11, 1972
respiratory function after, 9:13, 1973
Myocardium
heart muscle diseases, 5:23, 1969

N

National Heart Institute
study of cardiac catheterization, 4:27, 1968
Neurologic defects
resulting from rubella, 6:47, 1970
"Nitrogen narcosis"
hyperbaric oxygenation and, 7:73, 1971
Nurses
American Heart Association programs and, 3:5, 1967
changing roles for, 8:23, 1972
conferences and workshops, 8:23, 1972
confidence in and support for, 4:7, 1968
continuing education for, 8:23, 1972
coronary care units, 3:1, 1967
participation in voluntary associations, 8:23, 1972
Nursing care
coordination and continuity of care, 1:1, 1965; 3:9, 1967
legal aspects, 5:5, 1969
Nutrition counseling
cardiac patients, 2:31, 1966
See also Diet and nutrition

O

Obesity
cardiovascular complications, 5:19, 1969
and risk of coronary heart disease, 6:29, 1970
weight reduction and other therapy, 5:19, 1969
Obstructive cardiomyopathies, 5:23, 1969
Obstructive disease, chronic, 6:41, 1970
Oxygen
abnormalities, 9:1, 1973
catheterization and, 4:17, 1968
congestive heart failure, 3:19, 1967
decompression sickness, 7:69, 73, 1971
hyperbaric oxygenation
hazards and implications, 7:73, 1971
physical and pharmacological responses, 7:69, 1971
therapeutic benefits, 7:69, 1971
Oxyhemoglobin dissociation curve, 9:1, 1973

P

Pacing and pacemakers
asynchronous pacing, 8:1, 1972
atrial and ventricular synchronous, 8:1, 1972
complications, 8:1, 7, 1972
coronary care units, 3:1, 1967
demand, 6:57, 1970
demonstrating, 6:57, 1970
design and function of pacemakers, 9:7, 1963
detection of failure, 6:57, 1970
evolutionary developments, 8:1, 1972
fixed-rate, 6:57, 1970
hazards of electronic equipment, 8:7, 1972; 9:7, 1973
indications for, 6:57, 1960
long-term care, 8:7, 1972
medical aspects, 8:1, 1972
nursing care, 2:19, 1966; 8:1, 7, 1972
case history, 2:19, 1966
diagnosis and drug therapy, 2:19, 1966
postoperative responsibilities, 2:19, 1966
recurrence and rehabilitation, 2:19, 1966
surgery, 2:19, 1966
pathophysiology, 8:7, 1972
patient protection, 8:1, 1972
permanent internal pacemakers, 8:1, 7, 1972
reasons for pacing, 8:1, 1972
teaching patients with, 6:57, 1970
techniques for pacing, 8:1, 1972
temporary pacemakers, 8:1, 7, 1972
types of pacemakers, 6:57, 1970; 8:1, 7, 1972
Palpation
diagnosis of respiratory diseases, 6:41, 1970
Paralysis
dyspasic patient and family relationship, 6.51, 1970
Paroxysmal supraventricular tachycardias, 1:15, 1965
Patients
anxiety syndrome, 7:65, 1971
explanations and reassurances, 7:65, 1971
legal aspects of nursing care, 5:5, 1969
nursing assessment, 3:19, 1967
teaching plan for cardiac surgical patients, 5:1, 1969
Percussion
diagnosis of respiratory diseases, 6:41, 1970
Pericardial disease
heart muscle disease and, 5:23, 1969
Periodicals, nursing, 8:23, 1972
Peripheral arteriography
contrast visualization, 1:5, 1965
Peripheral vascular disease
prevention of, 7:77, 1971
Personality
as predisposing factor in coronary heart disease, 6:29, 1970
pH and acid balance
blood gas monitoring and, 7:61, 83, 1971
Physical activity
energy costs of individual human activities, 1:11, 1965
planning, 1:11, 1965

relationship between health and exercise, 1:11, 1965
Physical inactivity
and risk of coronary heart disease, 6:29, 1970
Physicians
legal aspects of action under recommendation of, 5:5, 1969
Pickwickian syndrome
obesity and, 5:19, 1969
Potassium depletion, 6:35, 1970
congestive heart failure and, 3:9, 1967
Precoronary care
emergency measures outside units, 8:11, 1972
nursing considerations, 8:11, 1972
Pregnancy and heart disease, 2:27, 1966
cardiovascular changes, 2:27, 1966
labor and delivery, 2:27, 1966
prognosis and treatment, 2:27, 1966
Premature beats, 1:15, 1965
Pressures
measurement by cardiac catheterization, 4:17, 1968
Prevention of heart disease, 7:77, 1971
congenital heart disease, 7:77, 1971
hypertension, 7:77, 1971
nursing activities, 7:77, 1971
precoronary care, 8:11, 1972
rheumatic fever, 7:77, 1971
Procaineamide
for cardiac arrhythmias, 1:15, 1965
Psychological consideration
on coronary care units, 7:65, 1971
patient's anxiety, 7:65, 1971
precoronary care, 8:11, 1972
Public health nursing
congestive heart failure patients, 3:15, 1967
Pulmonary angiography
contrast visualization, 1:5, 1965
Pulmonary arteries
chronic cor pulmonale, 3:25, 1967
Pulmonary circulation
in infants with transposition of great arteries, 9:27, 1973
Pulmonary congestion
means of relieving, 3:19, 1967
Pulmonary dysfunction
after acute myocardial infarction, 9:13, 1973
Pulmonary edema
congestive heart failure and, 3:19, 1967
fluid and electrolyte balance, 6:35, 1970
Pulmonary function studies
respiratory diseases, 6:41, 1970
Pulmonary heart disease
chronic cor pulmonale, 3:25, 1967
prevention of, 7:77, 1971
Pulmonary physiology
oxygen and carbon dioxide abnormalities, 9:1, 1973
Pulmonary problems
and nurse's changing responsibilities, 6:41, 1970
Pulse monitors, 7:61, 1971

Q

Quinidine
for treating arrhythmias, 1:15, 1965

R

Radiologic studies
contrast visualization of cardiovascular system, 1:5, 1965
Recovery
motivation for, 1:1, 1965
Refractory congestive heart failure, 3:9. 1967
Regional Medical Programs (HEW)
cardiovascular and pulmonary disease programs, 7:77, 1971
impact on nurses, 5:9, 1969
need for continuing education, 5:9, 1969
Rehabilitation and family counselling
children with congenital rubella, 6:47, 1970
Research in nursing, 8:19, 1972
clinical, 8:19, 1972
communicating results of, 9:23, 1973
evaluating research findings, 8:19, 1972
method and data analysis, 8:19, 1972
vital significance of, 8:19, 1972
Respirators
chronic cor pulmonale, 3:25, 1967
pressure-cycled, 3:28, 1967
volume, 3:28, 1967
Respiratory alkalosis and acidosis, 7:83, 1971
pulmonary physiology, 9:1, 1973
Respiratory diseases
data collection and assessment, 6:41, 1970
diagnostic tools and procedures, 6:41, 1970
educational preparation for nurses, 6:41, 1970
evaluation and treatment, 6:41, 1970
history taking, 6:41, 1970
increase in, 6:41, 1970
nursing assessment, 6:41, 1970
oxygen and carbon dioxide abnormalities, 9:1, 1973
pulmonary physiology, 9:1, 1973
Respiratory function, 3:25, 1967
Respiratory measurements
monitoring, 7:61, 1971
and nurse's changing responsibilities, 6:41, 1970
Rest
complications of prolonged bed rest, 1:11, 1965
congestive heart failure therapy, 3:9, 1967
inactivity and emotional repose, 1:11, 1965
as therapeutic measure, 1:11, 1965

Restrictive cardiomyopathies, 5:23, 1969
Resuscitation
closed chest cardiopulmonary, 2:23, 1966
complications, 2:23, 1966
decision for, 2:23, 1966
defibrillation, 2:23, 1966
discontinuation of efforts, 2:23, 1966
drug therapy and, 2:23, 1966
electrocardiographic evaluation, 2:23, 1966
physiological rationale, 2:23, 1966
post-resuscitative management, 2:23, 1966
techniques, 2:23, 1966
external cardiac compression, 2:23, 1966
restoring the airway, 2:23, 1966
ventilation of lungs, 2:23, 1966
Rheumatic fever
cardiac manifestations, 4:1, 1968
prevention of, 7:77, 1971
Rheumatic heart disease, 4:1, 1968
nursing observations, 4:5, 1968
symptoms and treatment, 4:1, 1968
Right heart
catheterization, 4:17, 1968
Right-to-left shunts
respiratory function after acute myocardial infarction, 9:13, 1973
Risk factors
coronary heart disease, 6:29, 1970
Rubella (German measles)
clinical manifestations, 6:47, 1970
congenital, 6:47, 1970
development of vaccine, 6:47, 1970
education and rehabilitation, 6:47, 1970
postnatal, 6:47, 1970

S

Safety programs
electronic equipment, 9:7, 1973
hospital wiring and safety, 9:7, 1973
Scientific sessions for nurses
nursing research and, 9:23, 1973
program objectives, 9:23, 1973
Sexual relationships
dysphasic patients, 6:51, 1970
Shock, cardiogenic, 5:15, 1969
congestive heart failure and, 3:19, 1967
diagnosis and treatment, 5:15, 1969
fluid and electrolyte balance, 6:35, 1970
monitoring of central venous pressure, 6:35, 1970
Shunts, right-to-left
respiratory function after acute myocardial infarction, 9:13, 1973
Size of heart chambers
appraising, 1:5, 1965
Smoking. See Cigarette smoking
Social and emotional problems
congestive heart failure, 3:15, 1967
Sodium retention
fluid and electrolyte balance, 6:35, 1970
Sounds and murmurs
cardiac catheterization and, 4:17, 1968
Stenosis of heart valves
angiographic studies, 1:5, 1965
Stokes-Adams syndrome, 2:19, 1966
Streptococcal infection
and rheumatic fever, 7:77, 1971
Streptokinase
fibrinolytic agent, 4:11, 1968
Stroke
anticoagulant therapy, 4:11, 1968
coordination and continuity of care, 1:1, 1965
encouraging motivation for recovery, 1:1, 1965
nursing responsibilities, 1:1, 1965
prevention of, 1:1, 1965
relieving fear and anxiety, 1:1, 1965
treatment programs, 1:1, 1965
Surgery
anticoagulant therapy following, 4:11, 1968
emotional aspects, 4:7, 1968
hyperbaric oxygenation therapy and, 7:69, 1971
postoperative, 2:19, 1966
activities following discharge, 5:1, 1969
disorientation, 7:65, 1971
teaching plan for patients, 5:1, 1969
preoperative environment, 4:7, 1968
psychological disturbances and, 7:65, 1971
rheumatic heart disease, 4:1, 1968
transposition of great arteries, 9:27, 1973

T

Tachyarrhythmias
pacing and pacemakers, 8:1, 1972
Tachycardias
paroxysmal supraventricular, 1:15, 1965
ventricular, 1:15, 1965
Tamponade
traumatic heart disease and, 4:23, 1968
Thermistors
for monitoring changes in peripheral blood flow, 7:61, 1971
Thromoembolism
anticoagulant therapy and, 4:11, 1968
participating and contributory factors, 7:77, 1971
prevention of, 7:77, 1971
Tracheostomy
chronic cor pulmonale, 3:25, 1967
Training programs
for hospital employees, 9:7, 1973
Transposition of great arteries
anatomical features, 9:27, 1973
diagnosis in newborn, 9:27, 1973
fetal and neonatal circulation, 9:27, 1973
open-heart surgery, 9:27, 1973
treatment, 9:27, 1973

Traumatic heart disease, 4:23, 1968
cardiac tamponade and, 4:23, 1968
delayed complications, 4:23, 1968
penetrating and nonpenetrating injuries, 4:23, 1968
Triglyceride levels
risk factor in coronary heart disease, 6:29, 1970
Tromexan (ethyl biscoumacetate)
for anticoagulant treatments, 4:11, 1968

U

Urokinase
fibrinolytic agent, 4:11, 1968

V

Vaccine and vaccination
for rubella, 6:47, 1970
Valvular insufficiency
angiographic studies, 1:5, 1965
Vasopressors
resuscitation and, 2:23, 1966
Ventilation
blood gas monitoring, 7:83, 1971
chronic cor pulmonale, 3:25, 1967
normal resting values, 4:17, 1968
resuscitation and, 2:23, 1966
Ventilation-perfusion
respiratory function after acute myocardial infarction, 9:13, 1973
Ventricular fibrillation, 1:15, 1965
cardiopulmonary resuscitation, 2:23, 1966
Ventricular premature beats, 1:15, 1965
Ventricular tachycardia, 1:15, 1965
Vertebral-basilar insufficiency
anticoagulant therapy, 4:11, 1968
Viral cardiomyopathies
prevention of, 7:77, 1971
Visceral angiography
contrast visualization, 1:5, 1965

W

Warfarin sodium
for anticoagulant treatments, 4:11, 1968
Water balance
electrolytes and, 6:35, 1970
Weight reduction
in obese patients, 5:19, 1969

X

X-rays
bi-plane x-rays, 1:5, 1965
contrast visualization studies, 1:5, 1965
